Application/Control Number: 10/538,628

Art Unit: 2627

This is a response to amendment filed on 10/23/06.

Specification

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims (1-2) are rejected under 35 U.S.C. 102(b) as being anticipated by van Roermund (4569072).

Regarding claim 1: Roermund discloses a negative feedback repetitive controller with memory loop (digital comb filter or adaptive (learn or programmable) comb filter or adaptive delay line) – see abstract and col. 8, lines 15-16 of Roermund. The period and the factor or the weight factor is disclosed in col. 5, lines 39 to col. 6, line 39 of Roermund.

Regarding claim 2: Roermund discloses a negative feed back repetitive controller with memory loop (see above rejection for details) in the environment of a disk drive (recording/reproducing apparatus – as depicted in figure 3 of Roermund) for compensating the eccentricity disturbance (col. 1, lines 17-29 of Roermund).

Application/Control Number: 10/538,628

Art Unit: 2627

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Steinbuch et al (5740090) discloses the definition for the memory control loop in col. 2, lines 29-45, furthermore, Steinbuch discloses the functions of the memory control loop with period and the factors. Hadley et al (5406126) could be read on claim 1 in col. 4, line 49 to col. 5, line 20; and; is not used this Office action because among other things. Nagano (5404418) is cited for negative feedback in a repetitive control with memory control loop. Moreover, Nagano could be read in claims (1 and 2) but not used in this Office action because of redundancy. Sullivan (5592346) is cited for memory loop in a repetitive controller.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to K. Wong whose telephone number is (571) 272-7566.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, H. Nguyen can be reached on (571) 272-7579. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a
